

## 2002 Firehawk: It doesn't get any better.

More Muscle and More Excitement. **345 Horsepower** and up to 90g on the skidpad.

As a kid, this is the Firebird you dreamed about, but never thought it would happen. Well, thanks to SLP Engineering's great relationship with Pontiac-GMC Division, Firehawk enters its 11th year of production. Now it's time to make your move.

New for 2002 . . . 345 horsepower courtesy of the world class LS1 V8 engine coupled to SLP's new High Flow Induction System and proprietary Dual-Dual Performance Exhaust. Hooking up that much power is handled by Firestone's new and improved 17"

SZ50 Extended Performance iras. As cool as Firehawk's functional hood is, the rear view is equally hot with the optional IFOC<sup>®</sup> inspired deck spoiler highlighted by a super wide CHMSL. You're all grown up now. Make your childhood dreams a reality . . . the 2002 Firehawk by SLP.

**SLP**
